Findings:

Northridge (NoRidge)has the highest overall average sale price ($335,295) and houses the highest price for a house in the dataset (up to $755K).

Northridge Heights (NridgHt) Has the highest median price ($315,000) and a robust sample size of 77 homes, making high-end property values the consistent baseline here rather than a rare exception.

Stone Brook (StoneBr) is a smallerneighborhood with 25 homes and a high average price ($310,499).

Patterns

In the dataset, the top-tier neighborhoods are heavily dominated by single-family detached houses (1Fam), primarily two-story houses.

While NoRidge is strictly single-family detached homes, both NridgHt and StoneBr both have a small mix of townhouses at different prices within the neighborhood.
